

# Spring 2020

## Welcome Galileo Health Academy Students!

The Volunteer Services Department is pleased to offer a joint venture with **Galileo Health Academy** and **California Pacific Medical Center** called, "The City Within." During this semester you will experience and witness the inner workings of California Pacific Medical Center, one of the largest private, not-for-profit, academic medical centers in California. CPMC is a Sutter Health affiliate. This semester, we will be learning from our dedicated staff of professionals about different areas of our medical

center. We will strive to learn about educational requirements for different departments, as well as, career paths chosen by our health care staff. This is a unique and very special opportunity to learn about future career choices that are available in a health care environment. We hope you will find this series interesting and that you will ask our knowledgeable staff many questions. You will be exposed to a very serious and professional environment. Our presenters have donated their time and effort to provide you with information in their area of specialty. Please treat them with your utmost respect and consideration. We hope your experience at California Pacific Medical Center is educational and helps you gain a sense of the duties and responsibilities of different jobs in the health sector, the varying educational and life paths people took to get there, and the passionate sense of mission that many people in the health services field possess.

### Schedule:

We will be meeting on Wednesday and Thursday mornings no later than **8:00 am** in the lobby of the various hospital campuses listed.

Please note the meeting room locations on the schedule below; if you are late or get lost, the staff at the Information Desks will guide you to our meeting room location. After each meeting, you will be taking public transportation back to school (see
